(c)	An article in a school science magazine stated, 'Many plants contain genes which enable them to pump salts out of their roots. These genes can be made more active by genetic engineering, enabling the plants to remove salts before the plants are damaged.'
	Explain whether you think that the process described in the article above is an example of genetic engineering.
	[3]
(d)	Some scientists believe that washing the salts out of the soil using even more water is a better alternative to genetic engineering.
	State two problems that could be caused by washing the soil with extra water.
